2. The foregoing 21,000 cubic feet of inactive records qualify for storage in the Federal Records Center at Suitland, Maryland. Their reference activity would total some ten per day (200 per month). Their Security Classification is within the limits set by the Office of Security study dated 4 November 1969 for CIA Records stored at Suitland. However, the question as to the "Sensitivity" or "Non-Sensitivity" of these inactive office records is outside the knowledge of the Records Center Staff. The proposed storage of specific files will have to be coordinated with the Component whose records are involved, the Office of Security, and the DDP/CI Staff in order to establish the Sensitivity criteria and to obtain approval for the transfer of the files to Suitland.
